RE: Case 000 - File and Error

Welcome to C.A.S.E. This training exercise will teach you to identify and solve Small Event Cases.

Mission: Three days ago, an unpaid intern hastily swept loose evidence into this folder from real cases. The folder itself generates false evidence by creating "averages" of real evidence. Your task is to identify which pieces are not original.

Success Indicator: Anything generated has been identified. Anything left is undoubtedly legitimate.

Panel — Title
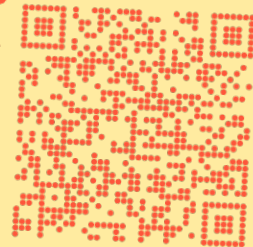

Solve this one and you're officially part of the team.

P.S. - Do not eat.
